

## Advanced Kingdom Leadership Course

### Module 5

#### Session Two: Leadership as Family – Raising the Next Generation

##### Overview

This session continues exploring the family model of leadership. It explains how healthy leadership cultures prioritize raising and developing people, much like parents raising children within a family.

##### 1. Family as the Foundational Model

Family was God's original structure for governing humanity.

It shapes identity, responsibility, and community development.

##### 2. The Attack on the Family

Family structures have faced significant challenges and cultural pressures.

Broken families often create confusion about identity and leadership.

##### 3. Family as a Launching Pad for Destiny

A healthy family environment prepares the next generation to succeed.

Parents are called to nurture and equip their children for greater impact.

##### 4. Generational Advancement

Psalm 127 describes children as arrows that can be sent further than the previous generation.

Strong leadership cultures intentionally prepare the next generation for greater influence.

##### 5. Jesus and the Model of Spiritual Family

Jesus created a relational leadership structure with His disciples.

He raised leaders through close relational investment.

#### 6. The Church as Spiritual Family

The Church functions as a spiritual family where believers grow and mature.

Spiritual leaders help develop new believers from infancy to maturity.

#### 7. Developing Leaders from Within

Healthy organizations prioritize raising leaders internally.

This approach reflects the family principle of nurturing growth.

#### 8. People as the True Priority

Leadership success should be measured by the development of people.

When individuals grow and thrive, organizations naturally prosper.
